

SHAWNA MUNN, P.ENG.

With over 15 years of experience in complex engineering projects, Shawna specializes in design strategies that streamline execution, reduce risks, and improve constructability. She focuses on solving problems and finding creative solutions to keep teams effective on challenging projects. Shawna combines engineering expertise with leadership in project management, risk management, and technical writing.

Shawna has contributed to major excavation projects in Toronto, including the Union Station Revitalization, Toronto York Spadina Subway Extension, and Eglinton Crosstown LRT. She is active in the geotechnical community, with publications for industry conferences and magazines like the Deep Foundations Institute, ADSC, and International Tunneling Association. Shawna is also a board member for the DFI Educational Trust.
